Share your dry-erase whiteboard in Any Zoom Meetings

Zoom users can now share their dry-erase whiteboard in real time directly with all meeting participants. Using Kaptivo, a smart camera which attaches to the top of any whiteboard, remote Zoom collaborators can experience the benefits of inperson brainstorming with the ability to see the board in high-resolution without any glare, smudges, or people blocking the board. Simply screen-share the Kaptivo whiteboard livestream and your content is automatically shared live with everyone.

- > Use your same dry-erase pens and write normally. No apps, downloads, or plugins.
- > Enable remote viewers to engage with whiteboard collaboration as easily as if they were in the room.
- > Real-time live updates appear when written on the dry-erase board

PLUG AND PLAY ZOOM ROOMS WHITEBOARD SHARING

- 1 | On Room Computer, select "camera" to activate Kaptivo
- 2 | Turn on Kaptivo by pushing blue control pad button
- 3 | Use your dry-erase board as normal. Same pens, no logins. It's that easy!
